May-June

**FASTENER  
POLAND®**

## 6<sup>th</sup> International Trade Fair of Fastener and Fixing Technology 18-19 October 2023, Krakow, Poland

We encourage you to familiarize with the second edition of the guide to the **FASTENER POLAND®** Trade Fair. In it you will find:

- presentations of selected companies
- list of Exhibitors
- hotel offer
- practical information

**register your  
participation  
in the trade  
fair >>**

The **FASTENER POLAND®** is the only international trade fair of fasteners organized in Central and Eastern Europe. Last year, as many as 65% of Exhibitors came from abroad. This year's edition promises to be equally good, as the participation of Exhibitors has already been confirmed, e.g. from: Czech Republic, Germany, Turkey, Switzerland, Sweden, Malta, Italy, Hungary, China, Vietnam and Taiwan. This fair shows the strength of the industry, responding to its growing needs year after year, so register and plan your stay at the event.

*„This year's edition of FASTENER POLAND® Fair has been very successful for me. I gained a lot of valuable business contacts in Poland. We had a few customers from Poland before, but now we see that Poland is still a growing market for us, and we see that production that up to now took place in East Asia is now moving to this region, and our parts are as suitable as possible for this type of production process”*

Joel Alexandersson, REHOBOT ROTEX AB, 2022

## Fastener zone for the energy, electrical and renewable energy sector

**NEW**

This unique area at the International Trade Fair for Fastener will provide an opportunity for buyers to cooperate with manufacturers and distributors. Poland ranks among the top ten countries in the world in terms of the size of the photovoltaic market. In Europe, only Germany and Spain are ahead of us in this respect. The industry is recording continuous sales growth and is developing dynamically. As a result, there is a growing demand for components, in particular specialised and quality fasteners for the photovoltaic and solar technology markets.

The fasteners market is responding to these needs by designing and supplying the best solutions with enhanced resistance to difficult conditions in which solar systems are used. Manufacturers and distributors of fasteners and fixing for photovoltaics, power and electrical engineering are invited to present their technologies and fasteners.

### **Your stands will be visited by:**

- manufacturers, suppliers, distributors, installers of photovoltaic and solar products and solutions;
- producers, suppliers, distributors, assemblers of hydro, wind, geothermal and biomass energy products and solutions;
- designers and integrators of PV and ST systems;
- EPC project contractors;
- providers of grid infrastructure and renewable energy integration solutions.

## ARSER S.r.l.

Stand D74

Leader manufacturer of socket set screws for all sectors. Great specialist of conic points: the sharp points are one of the top strengths, making ARSER famous in specific sectors like windows&doors. CONIC POINT – socket set screws conic point. Socket set screws range varies from M2 to M16 (special sizes M18 to M36) in traditional materials like steel 45H, stainless steel A2 and A4, but also aluminum and brass as well as special steel hardness of tempered steel.

## BEJ-POL PPHU

Stand D19

A representative of metal industry companies, for over 14 years in Poland as an exclusive agent of companies, and one of them is Subtil-Group – a German company that produces a wide range of springs for all areas of industry. It offers all kinds of technical springs: compression springs, extension springs, torsion springs, wave springs, spring sleeves and piston sleeves, as well as wire parts, stampings and bending parts and components of the highest quality. Subtil-Group has the following certificates: ISO 9001, IATF 16949, ISO 14001, ISO 45001.

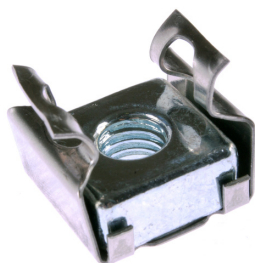

## BRYMOREX Sp. z o.o., Sp.k.

Stand D62

Importer and seller of bolts, screws, nuts, washers, rods and other fasteners on the Polish and foreign markets. The offer includes galvanized and black nuts in class 5, 8, 10 - DIN934 hexagonal nuts, DIN985 self-locking nuts, DIN6923 flange nuts, DIN315 wing nuts, DIN1587 cap nuts, DIN6334 union nuts.

## **FASTER S.r.l.**

Stand D34

Supplier of blind rivets, threaded inserts, nuts, screws, washers. The company has seen significant growth with the addition of a new range of engineering products such as cage nuts both in spring steel and stainless steel, profile cage nuts, cage nuts for mass continuity, cage screws, deep threaded u-nuts, push-on-fixes, cable clips. The company has a new line producing kits with bolts, washers, nuts and other fasteners with a barcode, QR code, customer logo and universal nylon fixing.

## **GRZEGORZ PAWLUS GP INDUSTRY SUPPORT**

Stand D46

Exclusive representative of Espytes on the Polish market. Espytes is a Spanish family company that specializes in the production of custom cold forged fasteners for the automotive industry. Examples of applications in the automotive industry: brackets, locks, hinges, parts of mirrors, cable ends and ties, steering components, brake pedal assembly, car-seats retention elements, rods and connectors in electrical components, elements of shock absorbers and suspension.

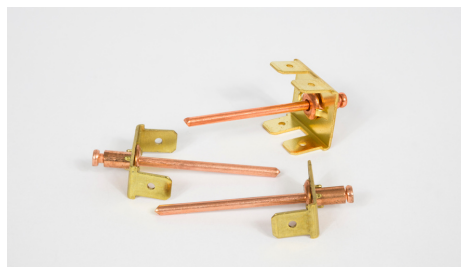

## **NYCZ INTERTRADE Sp. z o.o.**

Stand D61

Direct importer of fasteners, such as: screws, washers, nuts, threaded rods, chipboard screws, self drilling screws. Offer is directed to individual clients and merchant houses, production service companies. Hexagon head bolts made of steel are an essential element of various types of machines and structures. Carbon steel, stainless steel and acid-resistant steel are used in their production. Thanks to the use of this type of materials, it is possible to use bolts in the most demanding conditions such as rain, snow, hail or moisture.

## **SACTO S.r.l.**

Stand D23

Manufacturer and retailer for blind rivets, threaded insert and riveting tools. SACTO is one of the European leaders in fastener field. The earther rivet is the speediest method to effect grounding connections on metal structures. This rivet is produced in three versions: with 1, 2, 4 terminals. Test effected on this product confirm that, with electricity 25 A between the metal sheet and the two poles the resistance is less than 0,2 mhom and between the metal sheet and terminals is less than 0,6 mhom. This resultants could be obtained also applying the rivet on components which surface has been treated.

## **STEAM Sp. z o.o.**

Stand D20

Supplier of the highest quality fasteners for various industries. Assortment consists of various types of rivets, rivet nuts, spring nuts, inserts, pressed and welded elements as well as screw standards made according to drawing on special customer's request. The company will present a new generation CDP-99M welding machine. It has a digital positioning measurement system as well as a mechanical proces monitoring, which improves the work with this device. Perfectly copes with studs from M3 to M10. Thanks to the Gap-M gun, it is possible to weld studs made of various materials: copper-plated steel, stainless steel, aluminum and brass.

**How to become  
an exhibitor?**

For the sake of your time and convenience, we offer assistance in renting a hotel for the duration of your presence in Krakow during **FASTENER POLAND® Trade Fair.**

Through us you can book a hotel from our proposals and get a more favorable price offer

The service is completely free of charge. You can find hotel offer below.

**Hotel reservations department:**
